About

- 14+ years of hands-on experience in end-to-end architecture, design, development and troubleshoot of scalable Intelligent systems. Versed in C, CPP, CUDA, Java, Scala, Python, Go, Rust, SQL. Toolkits - PyTorch.
- MS CS UT Austin (2025 - present), B.Tech CS, IIT-Dhanbad (2006-2010).
- MS CS courses so far: Quantum Information Sciences, Deep Learning, Reinforcement Learning, Natural Language Processing, Parallel Systems, Advances in Deep Learning, Case Studies in Machine Learning. Current GPA 3.95.

Experience

January 2024 - June 2024

- **Ericsson India Private Limited, Bangalore** – *Software Architect, Product Development Leader - Cloud Software & Services*

Enabling teams deliver cloud-native, hyper-scale, resilient, robust, distributed data processing software solutions with security and quality. Involved in the end-to-end architecture, design, development & troubleshoot of distributed data platforms & intelligent solutions.

August 2017 - September 2023

- **Reliance Jio Platforms Limited, Bangalore** – *Architect, Data Platforms*

Responsible for driving end-to-end strategic business growth initiatives w.r.t. architecture, design & development of distributed data platforms & intelligent solutions. Lead innovator for multiple scalable solutions built, for both, on-premise and on-cloud environments, during this tenure.

October 2011 – July 2017

- **Nextag Inc, Gurgaon** - *Technical Team Lead, Engineering*

Over a tenure of close to 6 years, worked towards building resilient & robust platforms supporting large scale, streaming data ingestion pipelines, high capacity and low latency data processing layer & distributed analytical and predictive ML pipelines.

July 2010 - October 2011

- **Sapient Nitro, Gurgaon** - *Associate Technology L1, Development*

Worked as a software developer building, deploying & troubleshooting MVC based web applications.

Innovations & Patents

Lead innovator for multiple solutions - 6 patent applications (4 grants issue so far) in India Patent Office & USPTO - in the field of scalable, resilient and robust data processing, data analytics, data sharing & data security at-rest and in-motion. Brief summary on inventions are below

- **Data Receiver Framework** - India Scale, Ultra-fast, Reliable, Cost-optimal Streaming Data Receiver Framework. Patent Status - Granted, Patent No. 437290 (US 20230362459), File Date 30-03-2021
- **Data Ingestion & Processing Framework** - Scalable, Reliable & Fault-Tolerant low-code

Data Ingestion & Processing Platform. Patent Status - Granted, Patent No. 444914 (US 20230367783), File Date 30-03-2021

- **Format Preserving Encryption at Source Service** - Format Preserving Encryption at Source in a Big Data ecosystem to secure sensitive data sources at scale. Patent Status - Granted, Patent No. 531431 (US 20230359748) File Date 27-07-2021
- **Data Quality Platform** - Ultra-thin, fast, cost effective, reliable and consistent Data Quality Platform for Big Data ecosystem. Patent Status - Granted, Patent No. 574947 File Date 26-06-2021
- **Uniform Data Access API Platform** - Scalable, cost-optimal, auto-adjusting, self-adapting, intelligent & unified Data Access API Platform for varying enterprise workloads and data query patterns in a large scale Big Data Ecosystem. Patent Status - Published, Patent App No. 202221064463 (US 20240160629) File Date 11-11-2022
- **Advanced Business Intelligence, Notifications, Alerting & Rules Engine** - Secured, Scalable and Resilient, Data Visualization and Data Exploration Platform. Patent Status - Published, Patent App No. 202321006296 File Date 31-01-2023

Education

January 2025 - Current

- **The University Of Texas at Austin, USA** - *Masters of Science, Computer Science*
MS CS from The University Of Texas at Austin. Current GPA 3.93

August 2006 - May 2010

- **Indian Institute of Technology, Dhanbad** - *Bachelor in Technology, Computer Science & Engineering*
Completed Bachelor's in Technology from Computer Science & Engineering stream with an overall absolute GPA of 7.74

March, 2005

- **St. John's School, Mehrauli, Varanasi, UP** - *Higher Secondary Examination, ISC board*
Completed class 12th from Computer Science group with an overall score of 88%

March, 2003

- **St. John's School, Mehrauli, Varanasi, UP** - *Secondary Examination, ICSE board*
Completed class 10th from Computer Science group with an overall score of 91%

Certifications, Achievements & Awards

- **Behavior Design Course from Fogg Behavior Academy, Dr. BJ Fogg (2024)**
Successfully completed Behavior Design online course offering from Dr. BJ Fogg, founder of Behavior Design Lab, Stanford University.
- **Cloudera Data Impact Awards Finalist - Data For Good Category (2020)**
Built contact-tracing prototype during COVID-19 outbreak using telecom data at India Scale for approximately 400 million customers. Generated deep insights, by processing massive data feeds at peta-byte scale and velocity, to solve hard problems like - predict upcoming infection hotspots in areas of high population density and mobility AND measure lockdown effectiveness. Intelligent approximation algorithms for processing geo-spatial datasets at scale.
- **Sun Certified Web Component Developer (2009)** Cleared the Sun Certified Web Component Developer exam for Java Enterprise Edition 5 with an **aggregate score of 100%**
- **Sun Certified Java Programmer (2008)** Cleared the Sun Certified Java Programmer exam for Java SE 5 (310-055) with an **aggregate score of 91%**
- **IIT-JEE (2006)** Cleared the Indian Institute of Technology Joint Entrance Examination with an All India Rank of 3814.
